Detailed Action: Restriction

1. Applicant's election with traverse filed on 4/13/2007 is acknowledged. The traversal is on the grounds that the restriction was based on standard restriction practice as opposed to the applicable PCT rules. This is found to be persuasive and the examiner both respects and appreciates the applicant's diligence.
2. The original restriction requirement is deemed improper and is therefore removed. However, the original restriction is replaced with a restriction in accordance with the applicable PCT rules. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
3. This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1
 - I. Group 1, claims 1-2 & 6-15, drawn to a shadow mask material and uses for that material.
 - II. Group 2, claims 3-5, drawn to a process for manufacturing a shadow mask material.
4. The inventions listed as Groups 1 & 2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Art Unit: 2809

The supposed "special" technical feature of Group I is the shadow mask material of Claim 1 and that is fully shown in JP 3287257 B2 (NKK Corp.) as explained by the Japanese examiner who wrote the ISR. Likewise, supposed "special" technical feature of the Group II invention are the specific process steps which make the shadow mask material of Group I and they are shown to be rendered obvious by a combination of JP 3287257 B2 and AU 1521402 A (TOYO KOHAN Co., Ltd.).
